# Product Overview

## Ofzorig Eye Drops

### Active Ingredient:

- **Ofloxacin 0.3%** → A potent **4th generation fluoroquinolone antibiotic**

### Mechanism of Action:

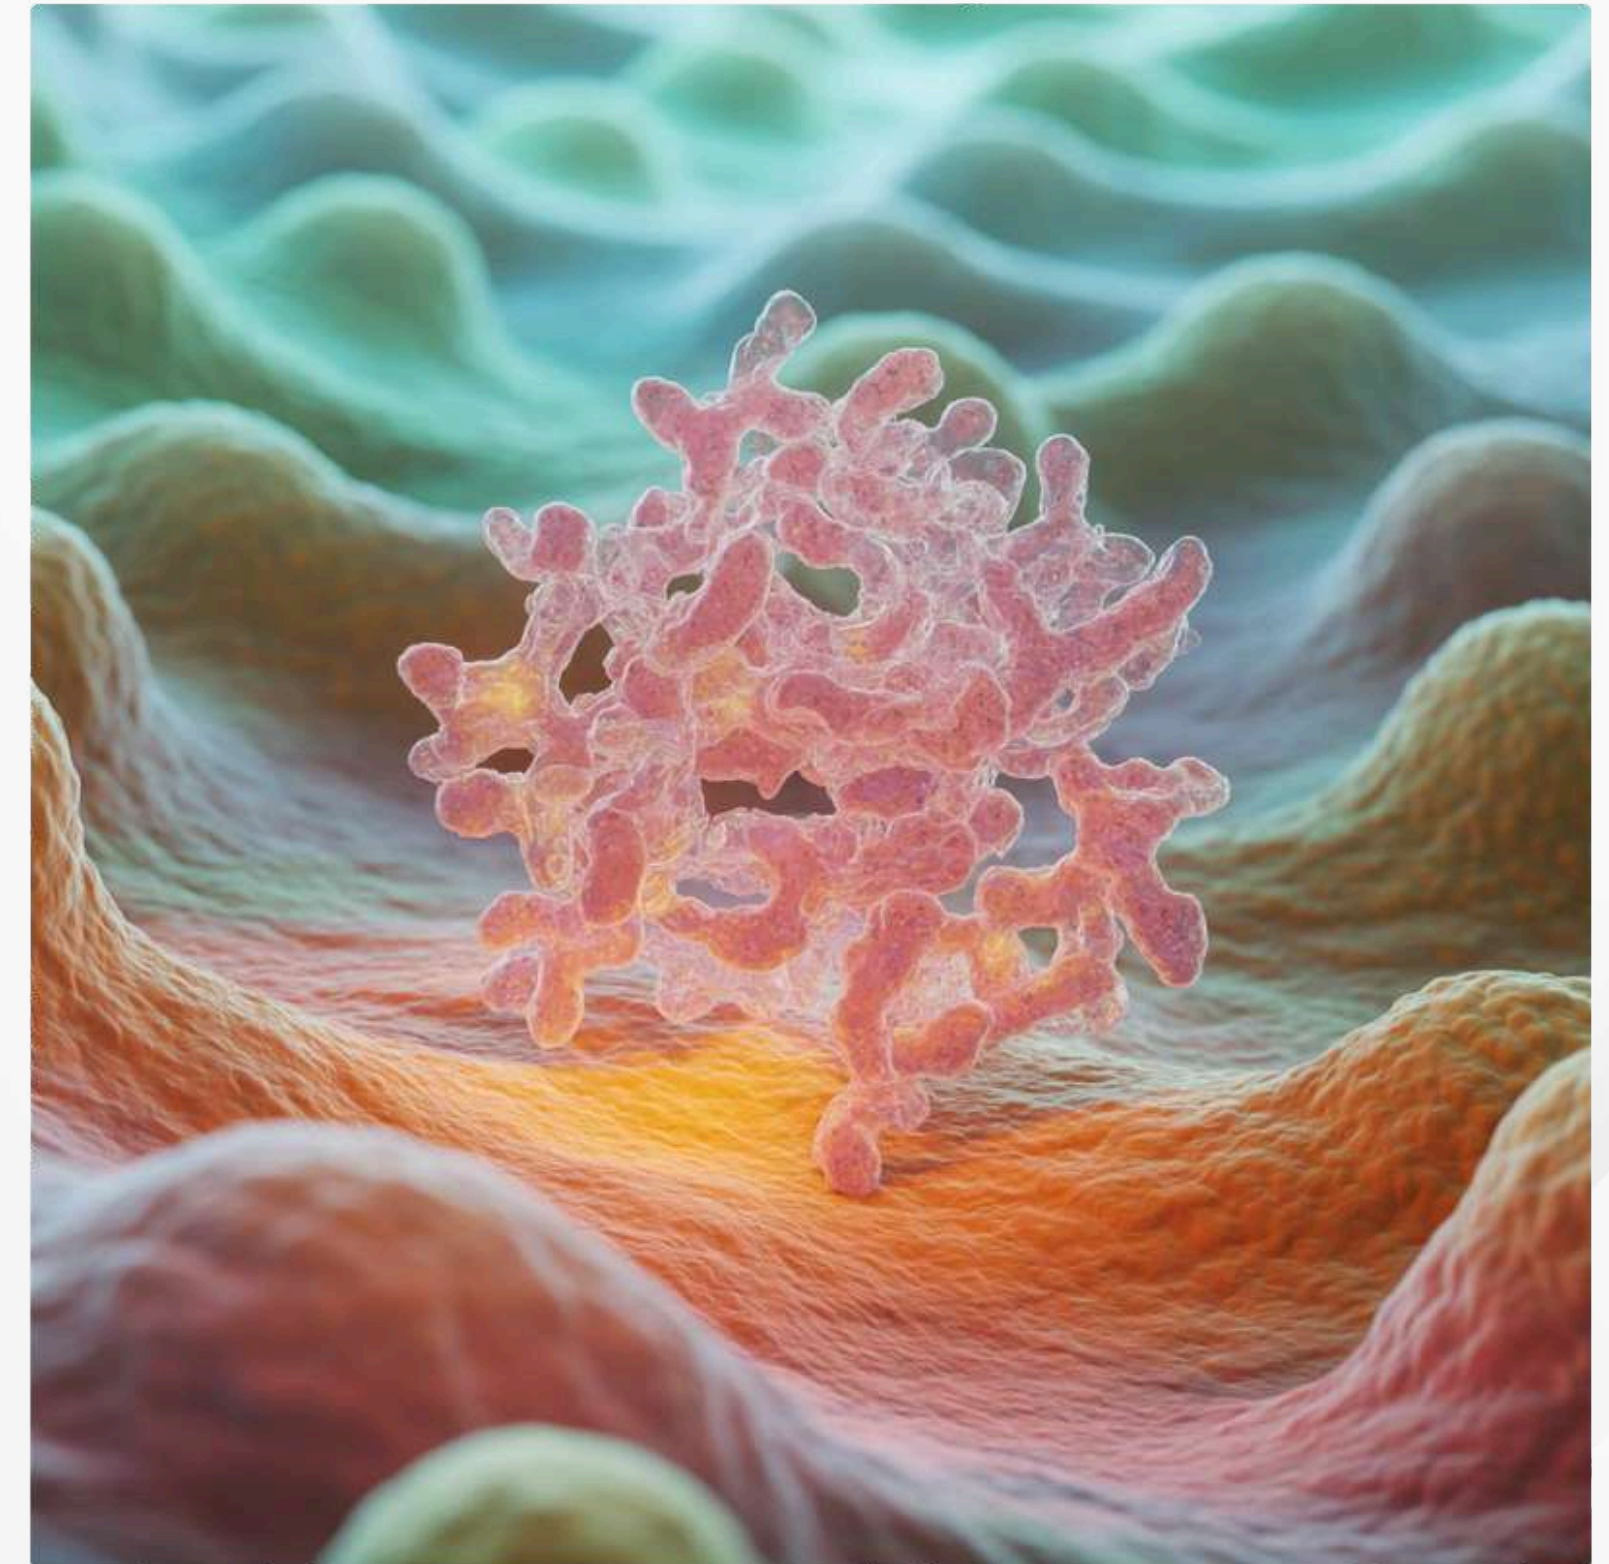

- Inhibits bacterial DNA gyrase & topoisomerase IV → prevents bacterial replication

### Multi-use formulation:

Effective against gram-positive & gram-negative bacteria

### Specially designed for:

Acute bacterial eye infections & post-surgical prophylaxis

# Why Ofzorix?

## Strong Antibacterial Activity

Rapid bactericidal effect against wide range of ocular pathogens

## Effective Treatment

Effective in **bacterial conjunctivitis, keratitis & blepharitis**

## High Penetration

High ocular penetration ensures faster relief

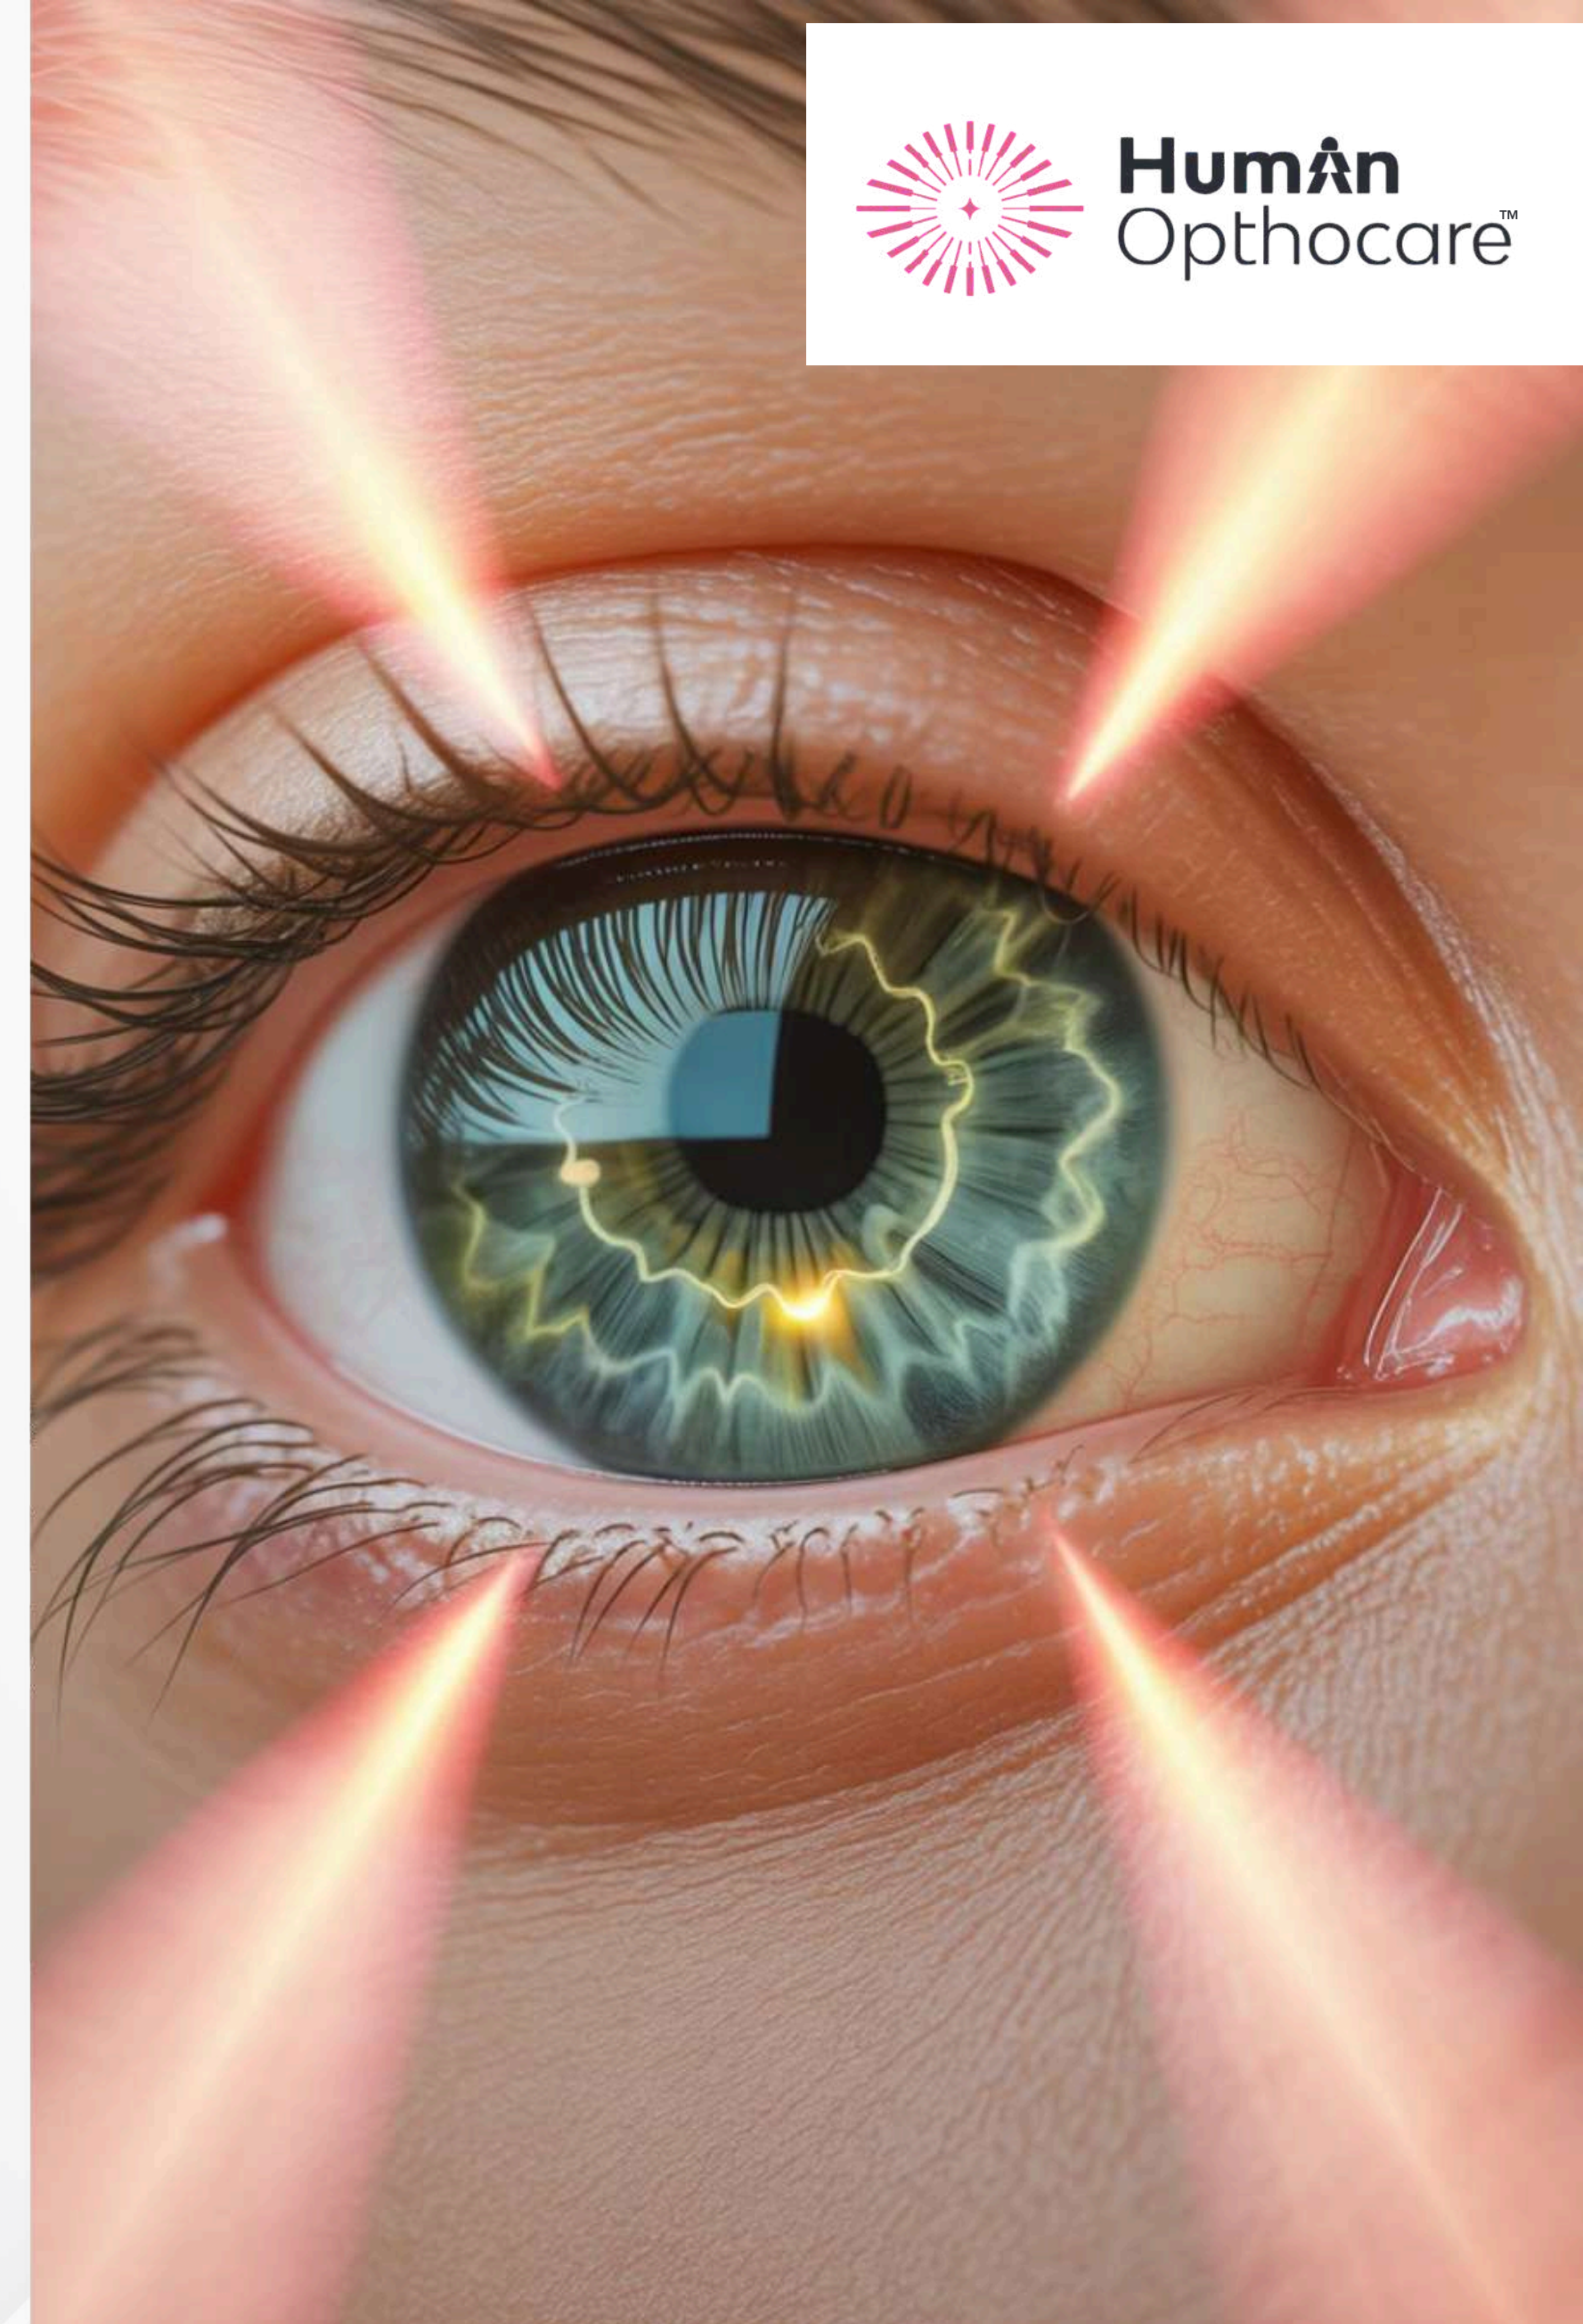

## Reduced Resistance

Reduces risk of resistance compared to older fluoroquinolones

**Human**  
Opthocare™

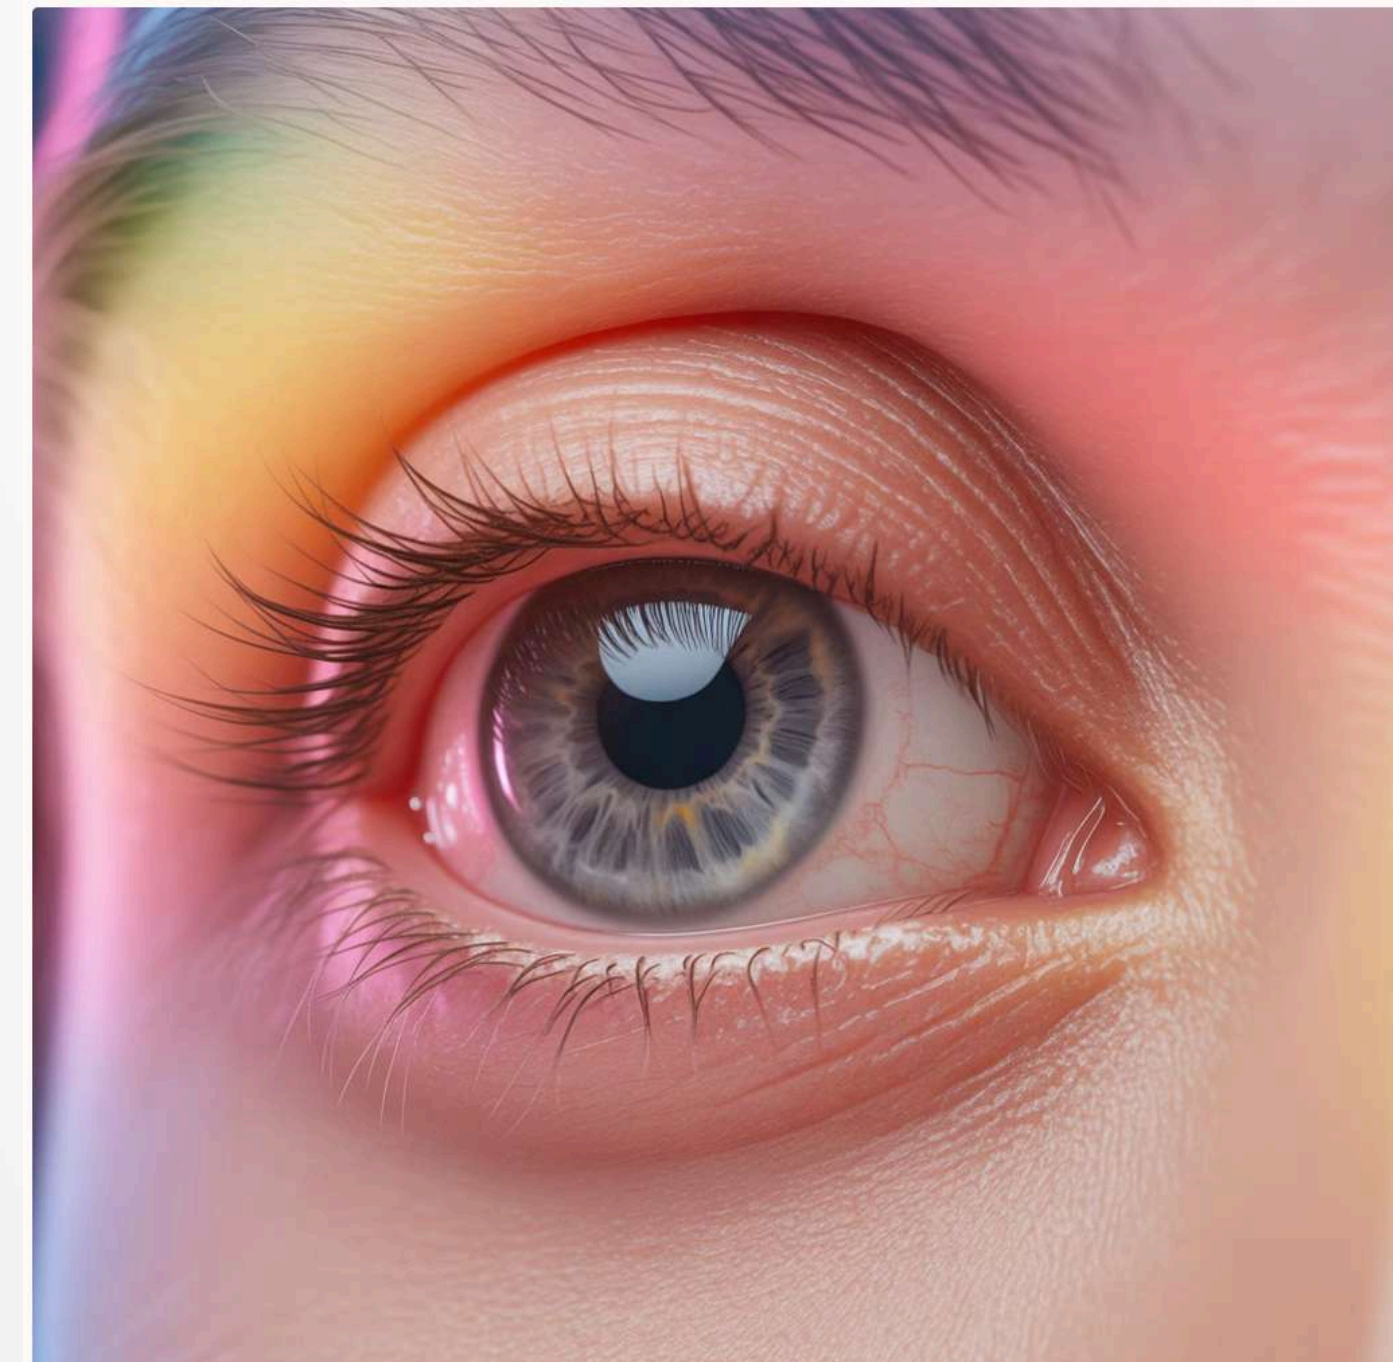

# Indications

💡 Ofzorix is recommended for:

- 1 Bacterial conjunctivitis  
(redness, discharge, irritation)
- 2 Corneal ulcers & keratitis
- 3 Blepharitis & meibomian gland infection

- 1 Post-surgical prophylaxis  
(cataract, LASIK, trauma)
- 2 Ocular surface infections  
caused by susceptible bacteria

# Clinical Advantages

## ★ Key Benefits of Ofzorix:

Broad-spectrum coverage

→ Gram +ve & Gram -ve

Rapid onset of action  
for faster infection control

Excellent safety & tolerability  
profile

High corneal penetration  
for better efficacy

Reduces post-operative infection risk

# Comparison with Other Antibiotic Drops

Parameter	Ofzorix (Ofloxacin 0.3%)	Ciprofloxacin	Tobramycin
Spectrum	✔ Broad (Gram+ & Gram–)	⚠ Limited Gram+	✔ Mainly Gram–
Resistance	✔ Lower	⚠ Higher	⚠ Moderate
Corneal Penetration	✔ Excellent	⚠ Good	⚠ Limited
Post-op Use	✔ Excellent	✔ Good	⚠ Limited
